PROFILE

Certified Data Analyst with a strong foundation in IT, digital transformation, and Salesforce administration. Proficient in SQL, Tableau, Python, and R, and Google BigQuery with hands-on experience in data migration and database administration. Recently completed the Coursera/Google Data Analytics Professional Certificate, further strengthening skills in data analysis, data-driven decision-making, and clean data practices. Proficient in leveraging data insights to improve operations and streamline workflows. Strong analytical, organizational, and communication skills to drive success in data-centric roles.

WORK EXPERIENCE

Chief Information Officer

Dancing Goat Gardens

August 2022 - February 2024

- Established and enforced business standards for clean data practices and data integrity in all sales and inventory systems reducing operational overhead by ~30%.
- Developed executive dashboards using Tableau and Google Sheets to track key business metrics.
- Led data cleaning processes, ensuring high-quality datasets for accurate decision-making.
- Spearheaded the implementation of an ERP and Point of Sale (POS) system, migrating all existing data into the new platforms.
- Drove data-focused initiatives, optimizing operations through data analysis and reporting.
- Developed data-driven strategies for business growth, aligning data insights with executive goals.

Training Coordinator

Doyles Sheehan

April 2019 - July 2021

- Structured SQL queries to support business functions, particularly in accounts payable and accounts receivable reducing reporting efforts by 15 hours per week overall.
- Collaborated with leadership to cleanse the AS400 DB2 database, addressing a long history of inconsistent data standards and improving data integrity.
- Led a special project to digitize monthly A/R reporting for an external accounting firm, streamlining processes and increasing efficiency.
- Responsible for creating, documenting, and editing business practices to support data cleansing and reporting goals.
- Trained staff on database management and proper data entry practices, improving overall business data quality and productivity by 25%.

Consultant

Cognizant (ATG)

January 2018 - April 2019

- Specialized in data migrations as part of the Salesforce Data Migration Team, ensuring smooth transitions between systems.
- Worked in an agile environment to deploy record and metadata for Salesforce environments.
- Led data cleaning projects, leveraging complex SQL queries and optimizing them for ETL processes.
- Focused on improving data accuracy and integrity during migrations and system updates.
